Professional Summary

Software Engineer with experience building production backend services and modern web applications. I enjoy solving real world problems through technology, from developing APIs used in production environments to building products that address challenges students face when searching for accommodation. Comfortable working across frontend and backend development, I enjoy collaborating with teams, learning continuously, and building software that delivers meaningful value.

Technical Skills

Languages: JavaScript, TypeScript
Frontend: React, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs
Database: MongoDB
Tools: Docker, Git, GitHub, Postman

Professional Experience

Founder & Software Engineer | UniStay

January 2026 – Present

- Lead backend development and contribute to frontend implementation and product planning.
- Design and develop REST APIs powering core platform functionality.
- Collaborate with the team on product direction, feature planning, and technical decisions.
- Build scalable backend services focused on reliability and maintainability.

Backend Developer Intern | Screws and Spanners

November 2025 – April 2026

- Built REST APIs supporting production application features.
- Developed location based API functionality using geolocation and user data.
- Resolved backend issues to improve reliability and performance.
- Collaborated with frontend and backend engineers and participated in code reviews.

Projects

UniStay

Student accommodation platform focused on making housing more accessible and transparent for students.
Role: Founder, Backend Lead, Product Contributor
Tech: React, Node.js, Express.js, TypeScript, MongoDB, Docker

Laddr Chess

Contributed to frontend development during a one month engagement, implementing user interface components and strengthening experience building responsive web applications with React.

Education

Lagos State University (LASU)
Bachelor of Science (B.Sc.) in Management Technology
2022 – 2026
Leadership: Departmental President
Final Year Project: Schedule Management and Performance of Employees: A Case Study of Julius Berger Nigeria Plc.
